

## Water-Supply Paper Volume 246-249 (Paperback)

By Geological Survey

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: .available for storage at a reservoir site in that vicinity. No important tributaries enter for several miles above and below the station. The drainage area is about 1,300 square miles. Considerable water is used for irrigation along Purgatory River both above and below this station, some 20,000 acres being irrigated. Storage is essential for the irrigation of an additional acreage, and some of the many reservoir sites will eventually be developed. No change has been made in the gage datum since the station was established. Gage heights during the winter months are somewhat affected by ice conditions, though the winter discharge is usually small. As the bed of the stream is of shifting character it is difficult to estimate accurately the daily discharge unless very frequent measurements are made. Discharge measurements of Purgatory River near Alfalfa, Colo., in 1907. a Wading measurement. Daily gage height, in...
